A Great \$2.40 Value for Only \$1.25 Postpaid

Every variety listed in this collection represents Quality that will please you. The seeds are tested and will grow. Full sized packets, such as we supply to our regular trade go into this collection, in fact the only cheap thing about it is the price. The reason we sell this collection at such a low price is two-fold: We can put up the boxes before the Spring rush starts, get them ready so that when the order comes all that need be done is to wrap the box, affix postage stamps and out it goes. This popular priced collection also gives new customers an opportunity to try a large assortment of our Quality Seeds at a moderate cost. Our margin of profit on this collection is smaller than on anything else we sell; yet we consider each collection sold, a good investment which in time, will bring us increased business.

Please do not ask for any discount in connection with an order for our Garden Collection and any special offers in this Catalog do not apply to or cannot be taken advantage of in connection with it. No changes can be allowed.

THE POSTAGE TO FOREIGN COUNTRIES must be added to the cost of the goods selected in this catalogue, or the order will be reduced to allow for the postage. These rules will also apply to orders from the United States where no postage allowance is made for mailing, or we will send by express.

Crops are dependent for success or failure on so many factors besides the seeds themselves that it is impossible for us to give any warranty. When the cotton comes up it should be off-barred deep while it is small in order to let the heat of the sun strike the beds. As the plants get larger, shallow down and towards the last, cultivate very shallow. Always keep the top crust of the ground broken in dry weather, as it prevents it from losing its form. Never stop plowing for wet weather until the ground turns in slices; then quit immediately until it dries off. Never lay-by until the middle of August. The first week in April has been found to be the best time for planting cotton.

NOTE:—All of our Cotton Seed is free from Boll Weevil. These are all good varieties which have been thoroughly tested and recommended by Agricultural Colleges and Experiment Stations of the Southern States.

Carpet Grass is also used extensively for meadows and pastures in the south. Lb. 30c; 5 lbs. \$1.15, postpaid.

LESPEDEZA or JAPAN CLOVER. One of the best clovers that can be planted in the South. Planted at the rate of one bushel to the acre from December to May. Lb. 25c; 5 lbs. 95c, postpaid.

These are placed in a frame and filled up with good rich soil, and five or six seeds in each box. When the plants come up, thin them out to one or two in each box. Before using dirt bands, wet them thoroughly before bending or they will be apt to break at the grooves, as they are made of thin veneered wood. 60c per 100; \$3.00 per 1000, not prepaid. It is used as a summer cover crop and soil builder in groves, orchards, vineyards, etc. Livestock will not eat it, therefore you will not be tempted to cut it for hay when your ground needs it so badly. This should be planted as soon as danger of frost is past and at a time when there is plenty of moisture in the soil, and can be planted as late as July, either broadcast or drilled. Ten pounds of seed is required per acre for broadcasting and half of that amounts if drilled. Grows from 5 to 10 feet depending entirely on the locality. Price: 40c per lb., postpaid. In 10 lb. lots at 25c per lb., not prepaid.

Flower seeds require a little more care in sowing than the vegetable seed. The ground should be well pulverized and light enough not to bake after a rain. Some of the more delicate and finer varieties are better sown in boxes or seed pans, where they can be handled and protected from hard rains or cold weather, the other kinds do not transplant well, and are better sown at once where they are to remain.

All flower seeds in packages are mailed free of postage to the purchaser. Where there is more than one color, we generally import them mixed, as we find that most of our customers do not wish to purchase six packages or more of one variety to get all colors. One package of Asters, Zinnia, Phlox, Chinese Pink, Stocks, Petunia, Portulaca and others will always contain an equal mixture of the best colors.

Wormoids

For Worms in Poultry. Most flocks are infected with worms. These parasites sap the health and vitality of the fowl, interfere with laying, stunt development and cost the poultry raiser thousands of dollars every year. Symptoms are drooping plumage, general weakness, loss of flesh or "going light," oftentimes paralysis and death. Wormoids is an individual treatment that is prompt, sure and safe. It comes in capsule form and is easily administered to every bird, usually at the same time the flock is culled, banded or treated for lice. Costs no more than flock treatments and is of course more sure and satisfactory. Comes in following sizes:
